

[Title of the abstract]

[Presenting Author]^{1,*}, [Second Author]^{1,2}, [Third Author]²

¹*[Department, Institution, City, Country]*

²*[Department, Institution, City, Country]*

* Presenting author: [email address]

Replace this text with your scientific abstract in English (maximum 300 words). State the research question or objective, briefly describe the methods, summarise the principal results, and explain their significance. Use specific findings where available and define unfamiliar abbreviations. The complete submission, including authors, affiliations, any figure, acknowledgement and essential references, must fit on one A4 page. Keep the prescribed margins and font sizes.

Replace every bracketed placeholder. Use superscript numbers to link each author to the correct affiliation; mark the presenting author with an asterisk. Retain the presenting-author email line. Delete unused optional sections and all instructional text, including this paragraph, before exporting your PDF. Submit the PDF together with the editable Word file or LaTeX source (a ZIP containing the source and figure files if needed).

Keywords: [Three to five keywords separated by semicolons]

[Optional figure or scheme and a short caption. Delete if unused.]

Acknowledgement: [Optional brief acknowledgement; delete if unused.]

References: [Optional essential references in numbered order; delete if unused.]
